SAFES

FOR YOUR EVERYDAY LIFE

PRODUCT CATALOGUE 2023

Chubbsafes

Trusted the world over.

MAKE SECURITY A VIRTUAL PART OF YOUR EVERYDAY LIFE

Try out the new AR functionality at www.chubbsafes.com and place a safe where you are standing right now!

All you need is a smartphone – no app needs to be installed. Visit www.chubbsafes.com, select a safe and take the first step towards making security a part of your everyday life.

EST. 1835

Trusted the world over, Chubbsafes is the oldest brand for safes, vaults and vault doors in the world. Chubbsafes solutions are well known and appreciated for their unique combination of robustness, reliability and modern designs.

Having provided high-quality protection solutions for almost two centuries, Chubbsafes combines experience with innovation to create trustworthy products for maximum protection against burglary, fire and explosives.

The Chubbsafes solutions are rigorously tested by international and independent accreditation bodies to guarantee the best protection available.

The Chubbsafes brand is used by Gunnebo under license.

T2
SECURITY UPGRADE

Shown here is the TriForce T2 which has undergone explosion testing (EX).

BURGLARY RESISTANCE SECURITY UPGRADE

The EN standard used in certifying safes and cabinets with a high level of burglary resistance has been recently updated to accommodate advanced tooling. These new tools are now listed in the standard under the "T2" tool list.

This means more sophisticated and powerful tools like a new generation of circular saws and thermal lances are used in independent burglary tests to proof our products' ability to resist them. This upgrade guarantees the highest current performance in physical security.

Chubbsafes is one of the first brands in the physical security industry to launch T2-certified safes. Learn more about the T2 security upgrade on our website www.chubbsafes.com.

ISO-CERTIFIED PRODUCTION SITES

We list sustainability very highly on our agenda; setting high standards for our products, our employee working conditions and for the environment in which we live.

The Chubbsafes products that are manufactured in our production sites are created under the most stringent production processes following the principles of the latest quality, health and safety and environmental management systems, and demonstrate our clear commitment to sustainability.

Sustainability	Safety	Quality
ISO 14001	ISO 45001	ISO 9001
www.dekra-seal.com	www.dekra-seal.com	www.dekra-seal.com
DEKRA certified	DEKRA certified	DEKRA certified

All Gunnebo Safe Storage production sites are certified according to ISO 14001 Environmental Management System, ISO 9001 Quality Management System and ISO 45001/ OHSAS 18001 Occupational Health & Safety System.

WHICH SAFE IS RIGHT FOR YOU?

The most important initial question is what you want to protect – cash and valuables, documents or data media?

CASH AND VALUABLES

Choose from the burglary protection range. This includes safes, cabinets, vaults & vault doors, designed to withstand physical attacks in different strengths or Grades. Each Grade represents a particular "cash rating" which is the amount an insurer will cover.

The actual amount of cover can vary between insurance companies and country, and may be different to the manufacturer's recommended rating. You should always check what cover your insurance company is prepared to offer.

DOCUMENTS AND DATA MEDIA

Choose from the fire protection range which includes safes and filing cabinets designed to keep documents or data media safe from the effects of a fire.

DOCUMENTS

To survive a fire, documents require protection from temperatures higher than 170°C. Therefore cabinets have to be specifically designed, tested and then certified for this task. Without a credible certification, you cannot be sure that your documents are safe.

DATA MEDIA

The same is valid for data media, except here the cabinet must offer much greater protection due to the sensitivity of the material. If the inside of the cabinet exceeds a mere 50°C, then the information on a CD, DVD or tape will be destroyed.

CERTIFIED STRENGTH

To provide the appropriate level of protection, the products are tested to comply with the latest industry standards. The various certification tests carried out in independent laboratories for burglary or fire protection are conducted by experienced operators armed with plans of the product and a whole range of tools.

FOR BURGLARY PROTECTION, safes and vaults are awarded grades:
- For security cabinets, there are Grades S1 and S2 (EN 14450).
- For safes, vaults and vault doors, they are rated from Grade 0 to Grade XIII (EN 1143-1).
- High security locks are graded according to EN 1300 in security levels A, B, C and D, the highest.

During the certification process, door panels of the products, bolt works, locks and handles are tested. The certification tests include an attack program that is devised so that various break-in attempts can be made using a selection of tools. A correlation between tool type and the time for which each one is used can be used to obtain a resistance score (resistance unit). The higher the score, the higher the level of resistance. Based on the results obtained, the safe is given a classification and then listed in a resistance grade.

FOR FIRE PROTECTION, these standards vary according to whether you want to protect paper documents, digital media or other highly sensitive objects. This is because the temperature at which data media (e.g. 50°C) and documents (e.g. 170°C) deteriorate differs according to the item protected:
- In order to fully protect data media, industry standards indicate that products should carry ECB•S EN 1047-1, UL 72 Class 125 or NT Fire 017 60/120 DIS.
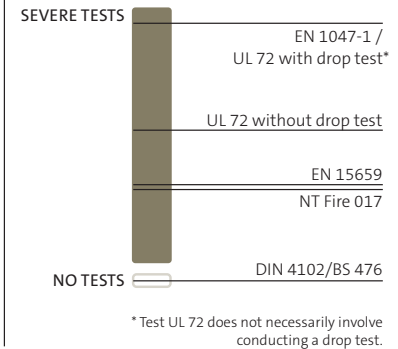

The ECB•S and UL tests monitor the internal temperature of the data cabinet until it has completely cooled down during the "soakout" period. Assessing products during this period is essential, since internal temperatures can peak up to six to eight hours after a fire has been extinguished. Such tests ensure that all products are comprehensively tested and, upon passing, will fully protect your data media for the specific time period stated.
- For document protection, all products must have an appropriate industry standard 30-, 60- or 120-minute paper certificate.
UL 72 Class 350, ECB•S EN 1047-1, EN 15659 or NT Fire 017 are acceptable standards for paper document protection.

LEVELS OF RESISTANCE

Alongside extremely strict standards, you will also find a number of others that are less stringent in terms of resistance.

SEVERE TESTS

EUROPEAN CERTIFICATION
FOR SAFES EXPLAINED

In order to attest to the quality of a certified product, an information plate is adhered to the inside of the product. This provides you with guarantees that the product has been tested and manufactured in an environment that has been checked by the certifying body.
Below is shown the ECB•S label and the details listed on the information plate.

BURGLARY PROTECTION CERTIFICATION

WHICH LOCK IS RIGHT FOR YOU?

Depending on the range, you can customise your product with a different lock. Thus you can benefit from a comprehensive lock offering that includes the latest industry solutions, which offer a wide range of features. So whether it be the "mechanical combination" lock or an electronic solution, you can be sure to have a lock that will meet your security needs. Below the key terms associated with the range of locks.

DEFINITIONS

KEY LOCK: A manual key-operated lock.

MECHANICAL COMBINATION: A mechanical keyless dial lock with a changeable combination.

ELECTRONIC LOCK: An electronically-operated keypad lock with a changeable combination.

MANAGER MODE: Allows one user to control the functions of other combination holders.

NUMBER OF USERS: The number of users able to program in their own access code.

DURESS FEATURE: An alarm engineer can link the lock into a monitored alarm system. Then, using a given procedure, the lock can be operated, the safe opened and a silent signal given to the monitoring station that this is being done under duress.

TIME DELAY: This feature allows for a pre-set delay between operating the lock and being able to open the safe. The operation may vary between lock types.

TIME LOCK: Time lock allows the user to set periods during which the lock may be operated, e.g. during business hours only. The options available will vary between locks.

AUDIT TRAIL: The lock is able to give a report (it will vary in detail from model to model) of usage and may show times of operation, codes used and operations performed.

DUAL CONTROL: Allows two users to enter their details before any operation can be performed.

CONSUL

BURGLARY-RESISTANT PROTECTION

**EN 1143-1
Grade 0–I**

KEY FEATURES

- Market leading light weight allows for easier installation.

- Burglary protection in accordance with EN 1143-1, as certified by ECB•S for Grade 0 and I.

- Composite door made from 10mm steel with an overall thickness of 35mm.

- The body is 45 mm overall, comprising the inner and outer steel walls, the space between which is filled with a multi-material burglary resistant barrier.

- 25mm diameter steel bolts secure the door, three operating horizontally and two each vertically upwards and downwards.

- Recessed door & concealed internal hinges which give a smooth finish & prevent areas of attack.

- Model 25 & above has the ability to store A4 Binders.

- Consul comes in two lock options:
  – Double-bitted 8 lever, EN 1300 Class A certified key lock to which two 90mm keys are supplied.
  – A user-programmable, EN 1300 Class B electronic lock capable of accepting two differing user codes and a time-delay function.

- The safe is prepared & anchoring kit is supplied to allow the Consul range to be securely base- or rear-fixed to resist unauthorised removal once installed.

KEY FEATURES

- Dual Certification: Burglary (EN 1143-1) Grade I and Fire (EN 15659, LFS 30 P).

- Certified locks: EN 1300 certified Class A key lock or Class B high-security electronic lock.

- Four models available: 32, 46, 63 or 190 litres.

- Secure bolt work and traditional heavy weight design.

- Enhanced design: removable door for easy installation and a reduced overall weight by 15%.

- Fittings: each safe is supplied with one shelf as standard.

- Attractive appearance: single-colour door and body in dark grey (RAL 7016).

- Ideal for the home or office.

DUOGUARD GI

BURGLARY & FIRE-RESISTANT PROTECTION
EN 1047-1	EN 1143-1
S 60 P	Grade I T2

KEY FEATURES

- Burglary protection in accordance to the highest certified resistance levels, available in Grade I T2, certified by ECB•S in accordance with the stringent European standard, EN 1143-1 T2. DuoGuard hereby complies and is certified with the world's strictest requirements for quality and burglary resistance.

- Approved by ECB•S in accordance with EN 1047-1 in class S 60 P for one hour's fire protection of paper documents.

- Torch-resistant barrier material – Dualite – ensures burglary and fire protection whilst also reducing its total weight and minimising transportation and installation costs.

- Ergonomic soft-touch handle and a range of internal fittings to maximise storage capacity.

- The three-way boltwork is made from solid steel bolts.

- A Class A mechanical key lock or a Class B high-security electronic lock, approved in accordance with EN 1300, are both available as primary lock options.

- Fitted with an active relocker and anti-drilling plates incorporated into the boltwork to withstand burglary attempts. (T200X carbide-clad steel plates).

MODEL SHOWN: PROGUARD M-370

PROGUARD

BURGLARY-RESISTANT PROTECTION

EN 1143-1
Grade III

KEY FEATURES

- Burglary protection in accordance with the European EN 1143-1 standard, as certified by ECB•S for Grade III.

- ProGuard's special barrier material provides certified burglary protection whilst also keeping the total weight of the safe down. Less weight means lower transportation costs and greater installation options.

- A higher level of protection can be offered in a safe with reduced wall thickness and increased interior capacity.

- The three-way boltwork is constructed with solid steel bolts.

- For additional security, ProGuard is fitted with an active relocker and anti-drilling plates have been incorporated into the boltwork to withstand burglary attempts.

- Either a mechanical key lock or a high-security electronic lock can be used as the primary lock option. At least one EN 1300 Grade B lock must be fitted as standard.

- Every model can be customised with a range of internal fittings to maximise storage capacity. NOTE: Brackets need to be ordered for each fitting

- ProGuard has a modern design with an ergonomic soft-touch handle.

DUOFORCE

BURGLARY & FIRE-RESISTANT PROTECTION

EN 1143-1
Grade III

NT Fire 017
60 Paper

KEY FEATURES

- Burglary resistance in accordance with the European standard, EN 1143-1, as certified by ECB•S for Grade III. Meets the demands of all Insurance Companies when it comes to burglary resistance.

- Tested by an independent, ISO 17025 accredited laboratory according to the NT Fire 017 – 60 Paper standard with certification managed by ECB•S. Protects your vital documents from the effects of fire.

- All sizes can be trusted to protect their contents not just against unauthorised forced burglary attack but also against the extreme temperatures experienced during fire.

- Supplied with one key lock as standard with the option of a factory fitted electronic lock or optional two locks. This gives the flexibility to customise how DuoForce can be secured and operated

- DuoForce Grade III introduces a new small size, Model 40; ideally suited to Residential clients requiring the safe storage of jewellery and valuables or needing to comply with local legislation concerning gun storage. DuoForce can be installed almost anywhere

- Ergonomic soft-touch handle and a range of internal fittings to maximise storage capacity

MODEL SHOWN: EUROPA M-320

EUROPA
BURGLARY-RESISTANT PROTECTION

NT Fire 017 60 min Gr. I–II	EN 1143-1 T2 Gr. I–III & V

KEY FEATURES

- Professional high security safe protecting valuables up to the highest certified resistance levels, available in Grades I T2, II T2, III T2 and V T2, certified by ECB•S in accordance with the stringent European standard, EN 1143-1 T2.

- EN 1143-1:2019 is the latest version of this globally respected burglary resistant standard. The new T2 classification includes tests with the more powerful and effective versions of the tools available to burglars today: Power tools, grinders, cutters and thermal tools have upgraded performance over earlier models. Europa T2 models provide protection against current and foreseeable future threats.

- Europa Grade I T2 & II T2 are certified NT Fire 017 – 60 Paper for one-hour protection of paper from fire by RISE.

- A choice of locking options are available at additional costs.

- Each safe can be equipped with high quality fittings to maximize storage requirements.

- Base fixing is standard on all models.

- Light grey finish (RAL 9002).

BURGLARY, FIRE & EXPLOSION-RESISTANT PROTECTION
EN 1143-1
Gr. IV–VI T2

Core Drill
(Optional)

EN 1143-1
Gr. IV–VI EX

NT Fire 017
60 paper

KEY FEATURES

- Burglary resistance in accordance with the updated and more stringent European standard, EN 1143-1:2019 T2, as certified by ECB•S for Grade IV, V and VI.

- Tested by an independent, ISO 17025 accredited laboratory according to the NT Fire 017 – 60 Paper standard with certification managed by ECB•S. Protects your vital documents from the affects of fire.

- Protection against explosives in Grade IV EX to VI EX. Certified by ECB•S in accordance with the stringent European standard, EN 1143-1.

- Optional Planar Protection is a fully integrated, alarm wiring matrix within the safe body. Designed to be connected up to existing in-situ security systems.

- Optional Core Drill (CD) protection is available whilst at the same time retaining fire protection, an industry first.

- Supplied with two locks as standard with the option of a factory fitted electronic lock. This gives the flexibility to customise how TriForce can be secured and operated.

- Ergonomic soft-touch handle and a range of internal fittings to maximise storage capacity.

SIGMA DEPOSIT

BURGLARY-RESISTANT PROTECTION

KEY FEATURES

- Laser-cut door made of 8 mm plate steel.
- Body made from 3 mm steel.
- 25mm diameter steel locking bolts.
- Shelf supplied in model 50.

- Sigma Free Standing Deposit Safes come with two lock options:
  – Double-bitted 8-lever key lock.
  – A programmable electronic lock (available for M-40 and M-50).
- An anchoring kit is supplied so the safe can be securely base- or rear-fixed, preventing unauthorised removal once installed.

Dimensions exclude handle and hinge projections.   Deposit Slot measures 170mm wide x 16mm high.

OMEGA DEPOSIT

BURGLARY-RESISTANT PROTECTION

KEY FEATURES

- Protects organisations from opportunist attacks.
- Ideal for retail outlets operating remotely from central areas and in multi-shift or out-of-hours environments where key holders are not always available.
- Securely holds cash without the need for the safes to be opened.
- Ensures that large quantities of money do not accumulate in the cash till.
- Door is made from 10mm steel.
- Body is made from 6mm steel.
- 20mm diameter steel bolts secure the door.
- Door bolts operate in three directions.

- An anti-fishing device prevents deposits from being removed once deposited into the deposit chute.
- Shelf supplied with model 50.
- Omega Deposit comes with three lock options:
  – Double-bitted 8-lever key lock.
  – A programmable multi-user electronic lock with optional dual control.
  – Electronic lock complete with a double bitted, emergency override key.
- An anchoring kit is supplied so the safe can be securely base- or rear-fixed, preventing unauthorised removal once installed.

RHINO MK II DT

BURGLARY & FIRE-RESISTANT PROTECTION

KEY FEATURES

- Designed for retail and commercial use.

- 65mm barrier thickness made of a high-density monolithic casting contained within inner and outer steel casings.

- Solid composite 35mm thick main door is combined with additional protection plates to protect crucial locking areas. Solid steel 28.5 mm diameter moving bolts attach the door to the body, while fixed "anti-heeling" bolts on the door's rear edge protect the hinge side.

- Deposit drawer with solid 10mm steel plate front combined with an internal anti-fishing mechanism to secure all items deposited.

- Main door secured by EN 1300 Class A primary locks which can be single lock, be it a key lock, manual combination or electronic lock depending upon individual requirements. For additional security, a second lock is possible.

- Drawer deposit unit secured by a single EN 1300-certified Class A lock.

- Two security fixing bolts to ensure it can be firmly fixed to the floor when installed.

MODEL SHOWN: PROGUARD DT M-45

PROGUARD DT
BURGLARY-RESISTANT PROTECTION

EN 1143-2
Grade DI–DII

KEY FEATURES

- Certified, tested and approved in accordance with the European EN 1143-2 standard, in Grades DI and DII.

- EN 1143-2 certified meaning that insurance ratings are not affected by the additional deposit function.

- Built using the same technology as the ProGuard, which is certified in accordance with the European EN 1143-1 standard for Grade II.

- Constructed using a new composite material designed for strength and reduction in total weight, keeping transportation and installation costs to a minimum.

- Solid steel three-way boltwork.

- Anti-fishing device to prevent anyone reaching the contents through the drawer.

- Fitted with an active relocker and anti-drilling plates incorporated into the boltwork to resist burglary attempts.

- A Class A mechanical key lock or a Class B electronic lock, approved in accordance with EN 1300, available as primary lock options. Electronic locks increase the level of security and prevent unauthorised access.

- Drawer trap fitted with a Class A key lock.

EXECUTIVE

FIRE-RESISTANT DOCUMENT PROTECTION

NT Fire 017 60 Paper	UL 72 Class 350 1h
KEY FEATURES

- Fire can strike anywhere – the office or the home. Executive Cabinets provide peace of mind: in the event of a fire breaking out, you can be sure that your paper work can be recovered in a usable condition.

- Ideal for storing essential documents such as wills, property deeds, contracts, insurance policies and many more.

- Certified by both RISE (NT Fire 017 – 60 Paper) and UL (UL Class 350 1hr) for 60 minutes' fire resistance.

- Overall body thickness of 50mm, comprising an inner and outer steel body containing a specially formulated fire-resistant solid barrier material.

- Models come with a choice of two lock options – A cylinder lock utilising a secure flat profile key.

- Overall door thickness of 66mm.

- Programmable and user-friendly electronic lock.

- An anchoring kit is supplied which allows the safe to be securely base-fixed, preventing unauthorised removal.

- Comes with internal fittings as standard, meaning that the unit is ready for use as soon as it is received.

LATERAL FIRE FILE

FIRE-RESISTANT DOCUMENT PROTECTION

UL 72
Class 350 1h

KEY FEATURES

- Certified by UL Underwriters Laboratories) to Class 350 Endurance 1 hour in accordance with Standard 72.

- Perfectly designed for today's modern offices, it sits closer to the wall for marginally more filing than traditional large filing cabinets, offering exceptional functionality and optimised storage.

- Maximised storage capacity with 3 or 4 drawers so users can fully meet their storage requirements.

- Easy-to-operate day catch to secure the drawers when closed.

- Units do not have to be locked to provide fire protection: they simply need to be pushed closed.

- High-quality steel sliders to ensure comfortable operation and full drawer access.

- Low-weight for reduced transportation and installation costs, and lighter floor loads.

- All models fitted with high-security locks as standard.

- Light Grey RAL 7035, powder-coated finish and modern design which blends nicely into any office environment.

- Manufactured in accordance with ISO 9001 for quality management systems and ISO 14001 for environmental management systems.

MODEL SHOWN: BINDER FIRE FILE M-160

BINDER FIRE FILE

FIRE-RESISTANT DOCUMENT PROTECTION

UL 72
Class 350 2h

KEY FEATURES

- Certified UL Class 350 Endurance protection by UL for up to two hours.

- Maximised storage capacity that allows users to gain full advantage for their storage requirements. Available with 3 or 4 drawers and each drawer holds up to 40 A4 DIN 33mm binders, hence 120 and 160 binders in the three drawer and four drawer versions respectively. By comparison, a standard free standing cabinet with five levels of storage each of 1m length can only hold 150 such binders. Thus the Chubbsafes Binder Fire Files are the perfect storage solution for the congested offices.

- Insulation between drawers means each drawer's contents are protected in an event of fire if one drawer is left open.

- Easy operable day catch to secure the drawers when closed. Units do not have to be locked to provide fire protection but just be pushed closed.

- High-quality steel sliders to ensure comfortable operation and full drawer access.

- Low-weight cabinets for reduced transportation and installation costs, and lighter floor loads.

- All models fitted with high-security locks as standard.

MODEL SHOWN: ULTRA FIRE FILE 31" M-270

ULTRA FIRE FILE 31"

FIRE-RESISTANT DOCUMENT PROTECTION

UL 72
Class 350

KEY FEATURES

- Certified in accordance with UL Standard 72 in Class 350 Endurance and Impact for both 1 hour and 2 hour duration.

- A shock absorbing plinth provides maximum impact absorption in the event of a floor collapse in a building fire.

- In two-hour certified models, each drawer is individually protected from fire. Even if one of the drawers is accidentally left open, the other closed drawers are still protected.

- Maximised capacity for optimized storage.

- Extended drawers give full access.

- It is available in two-, three- or four-drawer versions.

- Easy-to-operate day catch to secure the drawers when closed.

- Units do not have to be locked to provide fire protection but just to be pushed closed.

- Lighter weight construction, means easier transportation and installation.

- Fitted with high-security locks as standard.

- Light Grey RAL 7035, powder-coated finish and modern design which blends nicely into any office environment.

- Manufactured in accordance with ISO 9001 for quality management systems and ISO 14001 for environmental management systems.

MODEL SHOWN: DATAGUARD NT M-130

DATAGUARD NT

FIRE-RESISTANT DATA MEDIA PROTECTION

NT Fire 017
120 Diskette

KEY FEATURES

• Certified NT Fire 017 – 120 Diskette for two-hour protection of data media from fire.

• Single-door safe with no insert required – maximising internal capacity and up to 60% more storage space than other safes in the same class.

• User-friendly, slam-action door. When shut, provides full fire protection without needing to be locked.

• Adjustable shelving and drawer units supplied as standard.

• Available in four models, ranging from 30 to 128 litres.

• Choice of key or electronic locking.

PRODUCT SPECIFICATIONS

External heights and depths include plinth and handle projection.   Internal heights and widths are also equal to the clear opening measurements.

DATAPLUS

FIRE-RESISTANT DATA MEDIA PROTECTION

| EN 1047-1 | UL 72 | EN 14450 |
| S 120 DIS | Class 125 | S2 |

KEY FEATURES

- Easy slam action emergency closing in event of a fire.
- Generous capacity.
- High-quality media protection.
- Two-hour data media protection label. Tested to the highest international standards, UL 72 and EN 1047-1. DataPlus is certified as Class 125 2hrs with drop test by UL. EN Norm is certified by ECB•S in class S 120 DIS for fire resistance.
- Burglary protection in accordance with European norm EN 14450 and certified by ECB•S in security class S2.
- Easy to transport and install.
- Low weight ratio due to new advanced fire protection barrier material.

- Ability to customise by using internal fittings to optimise your storage capacity.
- Ability to base fix to the floor for effective prevention of physical removal.
- Removable front plate allows useage of a pallet loader for more efficient installation, reducing costs to the customer.
- The cabinet is fitted with a key lock as standard. However, you may require the monitoring of access to your sensitive data and therefore we have a series of electronic locks ranging from basic locking to more sophisticated audit trails.
- The cabinet is an attractive light grey which fits in well in most office interiors.

MODEL SHOWN: HOMESAFE S2 30P M-50

HOMESAFE S2 30P

BURGLARY & FIRE-RESISTANT PROTECTION

EN 14450
S2

EN 15659
LFS 30 P

KEY FEATURES

- Combined fire and burglary protection in one product.
- EN 14450 certified by ECB•S to level S2 burglary protection.
- EN 15659 certified by ECB•S for 30-minutes' fire protection for documents.
- Choice of 6 models: from 11- to 91-litre capacity.
- Choice of locking options in all models: EN 1300 certified double-bitted key lock or EN 1300 certified electronic lock.
- Dual base fixing holes, supplied with two concrete anchor bolts.

- Ideal solution for protecting cash and valuable items, as well as passports, title deeds and other important documents in the home and office.
- The cabinet's door is secured using the new revolutionary "V" bolt system. The design of the locking bolts helps maintain door integrity both when under physical attack and during a fire.
- The secure cabinet is prepared & anchoring kit is supplied to allow the HomeSafe S2 30P range to be securely base- or rear-fixed to resist unauthorised removal once installed.

PRODUCT SPECFICATIONS

Model	External Height (mm)	External Width (mm)	External Depth (mm)	Internal Height (mm)	Internal Width (mm)	Internal Depth (mm)	Capacity (litres)	Net Weight (kg)	No. of Shelves
M-10	300	360	300	210	270	191	11	24	1
M-20	300	445	390	210	355	281	21	32	1

M-90	1000	445	390	910	355	281	91	78	2

Hinges project 20mm beyond the depth given above. In standard electronic models, the overall projection increases to 30mm.

RHINO MK II

BURGLARY & FIRE-RESISTANT PROTECTION

EN 15659
LFS 60 P

EN 14450
S2

KEY FEATURES

- Body barrier thickness of 65mm; constructed from steel, welded throughout and filled with specially formulated Chubbsafes barrier material.

- A solid composite 35mm thick door is combined with additional protection plates for crucial locking areas.

- Solid steel moving bolts with a 28.5mm diameter affix the door to the body, while fixed "anti-heeling" bolts on both front and rear edges protect the door from prying attack.

- A Polyurethane base paint finish is used to coat the body and door. The paint is both scratch resistant and durable.

- Tested in accordance with EN 14450 Level S2, certified by ECB•S.

- Rhino Mk II has been tested in accordance with EN 15659, and is certified to level LFS 60 P by ECB•S giving 1 hour fire protection.

PRODUCT SPECIFICATIONS

MODEL SHOWN: MINI BANKER MK II, SIZE 4

MINI BANKER MK II

BURGLARY & FIRE-RESISTANT PROTECTION

| JIS S 1037 1h | EN 14450 S2 |

KEY FEATURES

- Body barrier thickness of 65mm; constructed from steel, welded throughout and filled with specially formulated Chubbsafes barrier material.

- A solid composite 35mm thick door is combined with additional protection plates for crucial locking areas.

- Solid steel moving bolts with a 28.5mm diameter affix the door to the body, while fixed "anti-heeling" bolts on both front and rear edges protect the door from prying attack.

- Glass relocker to ensure bolts to remain firmly in place should an attack on the lock occur (featured on model 2 and above).

- A Polyurethane base paint finish is used to coat the body and door. The paint is both scratch resistant and durable

- Tested in accordance with EN 14450 Level S2, certified by ECB•S.

- Fire Resistance tested in accordance to the Japanese Industrial Standard JIS S 1037 with fire resistance for up to 60 minutes.
